Allowable Subject Matter

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 4, 8, and 10, the prior art of record, Rasmusson et al., discloses a loudspeaker, coupled with a beamformer that receives and inputs from a plurality of microphones, and filters, wherein the filter are used to provide and estimate of the echo experienced by the microphones, and thus added to the microphone signal and then the combined signals are input the beamformer, where the combined signals are further processed to reduce echo components. Thus, the beamformed signal is the final process, the beamformed signal (current beamformed data) is not being further used. However, the prior art of record fails to disclose for each input signal an individual processing history of the adaptive echo canceling (an echo canceller) data being kept and then being combined with current adaptive beamforming data (beamformer) to perform a simultaneous process, therein as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
